DISCUS For First Article Inspections

Exclusive Opportunity for Pratt & Whitney Suppliers

Pratt & Whitney has selected DISCUS as the preferred FAI software product.

DISCUS allows you to work with an electronic drawing to rapidly identify characteristics and seamlessly document them on virtually any AS9102 FAI form. Rather than spending hours manually ballooning drawings, you can use a single, common process to meet all AS9102 requirements. Simply drop balloons on your drawing and create a list of characteristics that matches your customers' requirements. Available DISCUS features include optical character recognition and direct results entry that enable you to achieve a highly automated and self-contained characteristic-level documentation capability that integrates with the Pratt & Whitney FAI form.

Many Pratt & Whitney suppliers are already using DISCUS. Here's what some of them have to say:

- *Hundreds of aerospace supply chain users*
- *Demonstrated productivity gains of over 50%*
- *Full integration with Pratt & Whitney FAI form*
- *Special discount for Pratt & Whitney suppliers*

"Like many of our counterparts in the aerospace supply chain, we are having to do more with fewer resources. DISCUS gives us productivity, error-proofing, and integration with the PWA FAI format in a very cost effective way." - Joe Murphy, Chairman, Ferco Tech

"We work with complex drawings with hundreds of characteristics. DISCUS gives us great efficiency while ensuring attention to detail. Seamless data transfer to the Pratt & Whitney first article form is an added bonus." - Robert Sprole, CEO/President, Therm

Renaissance Services is the DISCUS systems integrator for Pratt & Whitney.
