

DISCUS 2020 Version 11.1.2 Release Notes

Previous Version: 11.1.1
Release Date: July 29, 2020
Release Type: Patch

BUGS

- Fixed a bug which caused the application to crash when using GD&T mode with the OCR add-on module enabled in some environments.
- Fixed a bug which caused the OCR engine to return the text “Error running icr.exe” when the OCR-add module was enabled and the Notes OCR mode was in use.
- Fixed a bug in which data entered into custom Requirement fields was not persisting.

OTHER

- Made improvements to the text fields within the GD&T editor dialog. Previously it was difficult to edit these fields using the expected keystrokes, cursor placement, and select/cut/copy/paste shortcuts; all of which are now functioning.
