

DISCUS Desktop 2026 U2 Release Notes

This Version: DISCUS Desktop 2026 U2 (v2026.2.0)
Previous Version: DISCUS Desktop 2026 U1 (v2026.1.0)
Release Date: 10/06/2026
Release Type: Minor Release

Desktop

- **NEW Parent/Duplicate Balloon Updates**
 - All balloon types now have copy-and-paste shortcuts
 - **CTRL + C – Copies**
 - **CTRL + X – Cuts**
 - **CTRL + V – Pastes a Duplicate**
 - **CTRL + SHIFT + V – Pastes as New**
 - Multi-selection can include any type of balloon for copying and pasting
 - Duplicate balloons now have shading for visual clarity and are highlighted when selected
 - **Balloon Properties** dialog now shows settings for a selected duplicate balloon instead of its parent balloon
 - Various clean-ups around copying, cutting, pasting, and undoing Duplicate Ballooning
- **NEW Added Search to Settings** for quick navigation through the ever-expanding Settings menu
- **NEW Added Stamp Functionality to Text Markup**
 - Save a Text Markup item for re-use as a Stamp in other TDPs
 - A list of Stamps now displays under the Text Markup icon
 - Added a Stamp Management Dialog for ease of updating and managing Stamps
- **NEW Added Arrowhead Leader Lines**
 - Leader Line icon now has a dropdown to select the type of Leader Line to draw
 - Leader Line defaults and arrowhead size can be configured in **Settings > Application Settings > Default Balloon Properties > Characteristic Balloon Properties** and can be individually configured via the **Balloon Properties** dialog in the Drawing Panel
- **IMPROVED** Leader Lines are easier to select
- **IMPROVED** Added Autocompletion to *Supplier* field in **Materials & Processes** and *Part Type* in **Parts List**
- **IMPROVED** Added Autocompletion on *Documented Nonconformance(s)* in **Part Accountability**
- **IMPROVED** Added drag-and-drop functionality to Custom Requirement and Custom Field Predefined Lists
- **IMPROVED** A default Signature Image can now be set in **Settings > Application Settings > Company Info**
- **IMPROVED** Version History added to TDP metadata upon Save

- **IMPROVED Custom Requirement** and **Custom Field *Predefined Lists*** can have their values disabled to preserve values instead of outright deleting them
 - Importing **Results** has been updated to alert users when a disabled or deleted field is trying to be imported
- **IMPROVED License Keys** are now masked wherever they are displayed
- **IMPROVED** Added the ability to include **Attachments** to the **Help > Submit a Support Request** form. File size limitations are under investigation
- **IMPROVED Requirement Images** are excluded from Excel Export by default now
- **IMPROVED Drawing Tab order** is maintained between sessions
- **FIXED** Upon installation, DISCUS removes a deprecated Java EXT folder from the installation directory that was causing the application to fail to launch
- **FIXED DMS** notation would fail validation in Comma-delimited TDPs
- **FIXED CTRL + S** no longer activates **Sub-balloon mode**
- **FIXED CTRL + A** no longer activates **Autoballoon mode**
- **FIXED Zone Grid Lines** moving properly refreshes **Location** in BoC
- **FIXED** Occasionally, a balloon on a **Specification** document could have a broken **Characteristic Properties** dialog
- **FIXED Balloon Properties** dialog in **Drawing Panel** didn't refresh when selecting a different balloon
- **FIXED Autosaving** was recently broken and now works again
- **FIXED** Resolved various **Undo** scenarios
- **FIXED** Entering Tolerances as **+/+** or **-/-** had some logic associated with ordering of the smaller and higher values. This has been cleaned up to be in line with standards. Additionally, we found use cases where tolerance signs could be ignored and defaulted back to **+/+**. This fix should remove most cases of this happening

Results

- **NEW Filters** can now look at Result values and use comparison operators like **<** and **>**
- **NEW Result Status Reason** is now a **column** that can be set to visible to better understand a given Characteristic's Result Status
- **IMPROVED Sub-balloons** with Failing Result values properly report as Failed

3D

- **NEW QIF Support** added (BETA)
 - Currently, QIF support is limited to loading model geometry and Notes PMI
- **NEW** Model format support added for...
 - SolidWorks 2026
 - NX 2512
 - CATIA V5-6R2026
 - Parasolid 38.1
 - Solid Edge 2026
 - JT 10.10, 10.11
 - CREO 13.14
- **FIXED** Issue closing and reopening TDPs that caused balloons to fail to be drawn on the model

Planner

- **NEW** Added the ability to import and export **Routing Tables**
- **IMPROVED Process Plan Properties** synchronizes corresponding fields across the TDP
